Guardian Network Solutions Redesigns Newsletter for 2014

Fort Worth, TX: December 1, 2013 – Guardian Network Solutions is re-vamping their monthly newsletter starting in 2014. The 2014 version of "Business Bytes" will have a completely fresh and user-friendly design filled with more tips, products and will be more aesthetically appealing with a completely new design. Filled with more content and more current events, readers will be more in tune with what is evolving in the tech world and the benefits provided for businesses. There will be a small business news section as well that will inform readers about small business industry buzz.

Since Guardian Network Solutions is a reputable software and hardware provider for small businesses, they like to do what they can to keep up with the everyday needs of their clients. In the new and improved newsletter, subscribers will also be able to find a "Tech Tips" section that will address common IT problems that small businesses come across in hopes to answer any questions that users typically have. Another thing Guardian Network Solutions has really improved on is their use of Social Media. They have expanded their use of social media platforms and are now on Facebook, Twitter, Google +, Linked In, and Pinterest. These sites will all be accessible through the newsletter. This new version of the newsletter is definitely one that readers should be excited about.

About Guardian Network Solutions

Guardian Network Solutions is a value added reseller of software and hardware products for very small businesses nationwide. We specialize in the areas of network security, backup, and virtualization. The value to a client exists within our determination to provide them with a dedicated account manager who will return same-day quotes and always answer their phone.
